Summary

Backend developer with two years of experience building Java and Spring Boot services for payments and logistics products. Comfortable owning an API from design to production monitoring, and keen on clean code, tests, and fast incident response.

Experience

Software Engineer Jul 2024 – Present
Paynest Technologies, Mumbai

- Built the refund and settlement APIs in Spring Boot, handling about 40,000 transactions a day for 300+ merchants.
- Cut p95 response time of the merchant ledger API from 820 ms to 240 ms by adding Redis caching and rewriting two slow PostgreSQL queries.
- Moved nightly reconciliation from cron scripts to Kafka consumers, reducing manual follow-ups by the finance team by around 60%.
- Raised unit test coverage on the payments module from 48% to 81% with JUnit and Mockito.
- Joined the on-call rotation and wrote runbooks for the five most frequent alerts.

Software Engineering Intern Jan 2024 – Jun 2024
ShipKart Logistics, Pune

- Developed a shipment tracking microservice that pushed status updates to customers over SMS and email.
- Containerised three internal services with Docker and set up Jenkins pipelines for them.
- Wrote integration tests for courier partner webhooks, catching four mapping bugs before release.

Education

St. Francis Institute of Technology, University of Mumbai 2020 – 2024
B.E. in Computer Engineering — CGPA 8.4/10 *Mumbai*

- Coursework: Data Structures, DBMS, Operating Systems, Computer Networks

Projects

Expense Splitter API

- Spring Boot and PostgreSQL REST API for group expenses with JWT login and settle-up suggestions.
- Deployed on AWS EC2 with RDS; used by a 30-member hostel group for a semester.

Library Seat Booking System

- Booking service for the college reading room with time slots and a waitlist.
- Reduced double-bookings at peak exam time to zero in its first month.

URL Shortener with Analytics

- Spring Boot service with Redis redirects and daily click counts, load-tested with JMeter.

Skills

Java, Spring Boot, REST APIs, PostgreSQL, MySQL, Redis, Kafka, Docker, AWS (EC2, S3, RDS), JUnit, Mockito, Git, Jenkins, Linux, SQL tuning

Certifications

- Oracle Certified Associate, Java SE 8 Programmer
- AWS Certified Cloud Practitioner
