Summary

Frontend developer with 18 months of experience building fast, accessible React interfaces for SaaS products. Cares about performance, clean components, and close work with designers to ship polished screens.

Experience

Frontend Developer Jun 2024 – Present
Cloudledger Software, Ahmedabad

- Built the invoicing and reports screens of a GST billing SaaS used by 2,000+ small businesses.
- Reduced dashboard load time from 4.1 s to 1.6 s with code splitting and memoised charts.
- Created a shared component library in React and TypeScript now used across three products.
- Raised accessibility score from 68 to 96 by fixing labels, focus order, and contrast.
- Reviewed pull requests and mentored two interns on testing with Jest and React Testing Library.

Frontend Intern Dec 2023 – May 2024
Pixelcraft Studio, Vadodara

- Converted Figma designs into responsive pages for four client websites.
- Built a booking form with validation and connected it to the client's REST API.
- Improved Lighthouse performance scores above 90 on all delivered pages.
- Fixed cross-browser layout issues on Safari and older Android browsers.

Education

Nirma University, Institute of Technology 2020 – 2024
B.Tech in Computer Engineering — CGPA 8.3/10 *Ahmedabad*

- Coursework: Web Technologies, Human-Computer Interaction, DBMS
- Design lead for the college tech fest website, visited by 15,000 students

Projects

Trip Planner for Gujarat Heritage Sites

- Next.js app with maps, day-wise itineraries, and offline support, deployed on Vercel.
- Used by 500+ visitors in the first month after sharing in travel groups.

Habit Tracker PWA

- React and IndexedDB progressive web app with streaks, reminders, and dark mode.
- Works offline and installs to the home screen on Android and iOS.

Open-Source Contribution — React Date Picker

- Fixed keyboard navigation and screen-reader labels in a popular date picker library.
- Two pull requests merged after review by the maintainers.

Skills
