SKILLS

Java, Spring Boot, Kafka, MySQL, Redis, Docker

EXPERIENCE

Paytm | Backend Engineer | Feb 2021 - Present

- Designed and implemented an event-driven settlement pipeline on Apache Kafka that processes more than four million merchant transactions every day with exactly-once semantics and full auditability.
- Reduced the median API latency of the wallet balance service from 180 ms to 45 ms by introducing a Redis read-through cache and rewriting the hottest MySQL queries.

Capgemini | Software Engineer | Aug 2018 - Jan 2021

- Migrated a monolithic insurance claims application to Spring Boot microservices running on Docker, coordinating releases across three teams in two countries.

PROJECTS

Rate Limiter 2022

- Token-bucket rate limiter library for Spring Boot applications with Redis-backed distributed counters and per-route configuration.

EDUCATION

University of Mumbai
Bachelor of Science in Computer Science
2015 - 2018
