Noida, Uttar Pradesh

SUMMARY

Engineering manager with 12 years across fintech and e-commerce.

SKILLS

Java, Spring Boot, Microservices, Kafka, AWS, Kubernetes, Docker, PostgreSQL, MongoDB, React, TypeScript, Terraform, Jenkins, Git

EXPERIENCE

PhonePe | Engineering Manager | Apr 2020 - Present

- Delivered initiative 1 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 2 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 3 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 4 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 5 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 6 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 7 at PhonePe: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.

Amazon | SDE III | Jun 2016 - Mar 2020

- Delivered initiative 1 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 2 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 3 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 4 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 5 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 6 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 7 at Amazon: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.

Snapdeal | SDE II | Jul 2014 - May 2016

- Delivered initiative 1 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 2 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 3 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 4 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 5 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 6 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 7 at Snapdeal: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.

Oracle | Member of Technical Staff | Aug 2012 - Jun 2014

- Delivered initiative 1 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 2 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 3 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 4 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 5 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 6 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.
- Delivered initiative 7 at Oracle: designed, built and operated a high-throughput service with strong observability, on-call ownership and measurable cost savings.

PROJECTS

Open source project 1 2015
- Maintainer of a Java library with 1k GitHub stars.

Open source project 2 2016
- Maintainer of a Java library with 1k GitHub stars.

Open source project 3 2017
- Maintainer of a Java library with 1k GitHub stars.

Open source project 4 2018
- Maintainer of a Java library with 1k GitHub stars.

Open source project 5 2019
- Maintainer of a Java library with 1k GitHub stars.

EDUCATION

IIIT Hyderabad
M.Tech Computer Science
2010 - 2012
Jamia Millia Islamia
B.Tech Computer Engineering
2006 - 2010

CERTIFICATIONS

AWS Solutions Architect – Professional
CKAD

ACHIEVEMENTS

Spot award 2019

INTERESTS

Long-distance running, chess
